

**Senior Executive Seabasing Forum  
April 21**

**Seabasing  
Moderator: VADM Frank Donovan, USN (Ret)**

**Connecting the Connectors  
-Jack Finnegan, MacGREGOR (USA) Inc.**

# The Seabase

- **A place in the ocean to:**
  - rapid deployment, assemble, command, project, reconstitute, and reemploy joint combat power from the sea,
  - while providing continuous support, sustainment, and force protection to select expeditionary joint forces
  - **WITHOUT** reliance on land bases within the Joint Operating Area (JOA).
  - These capabilities expand operational maneuver options and facilitate assured access and entry from the sea.
  - *(Seabasing Joint Integrating Concept v.71)*

# **The Seabase includes:**

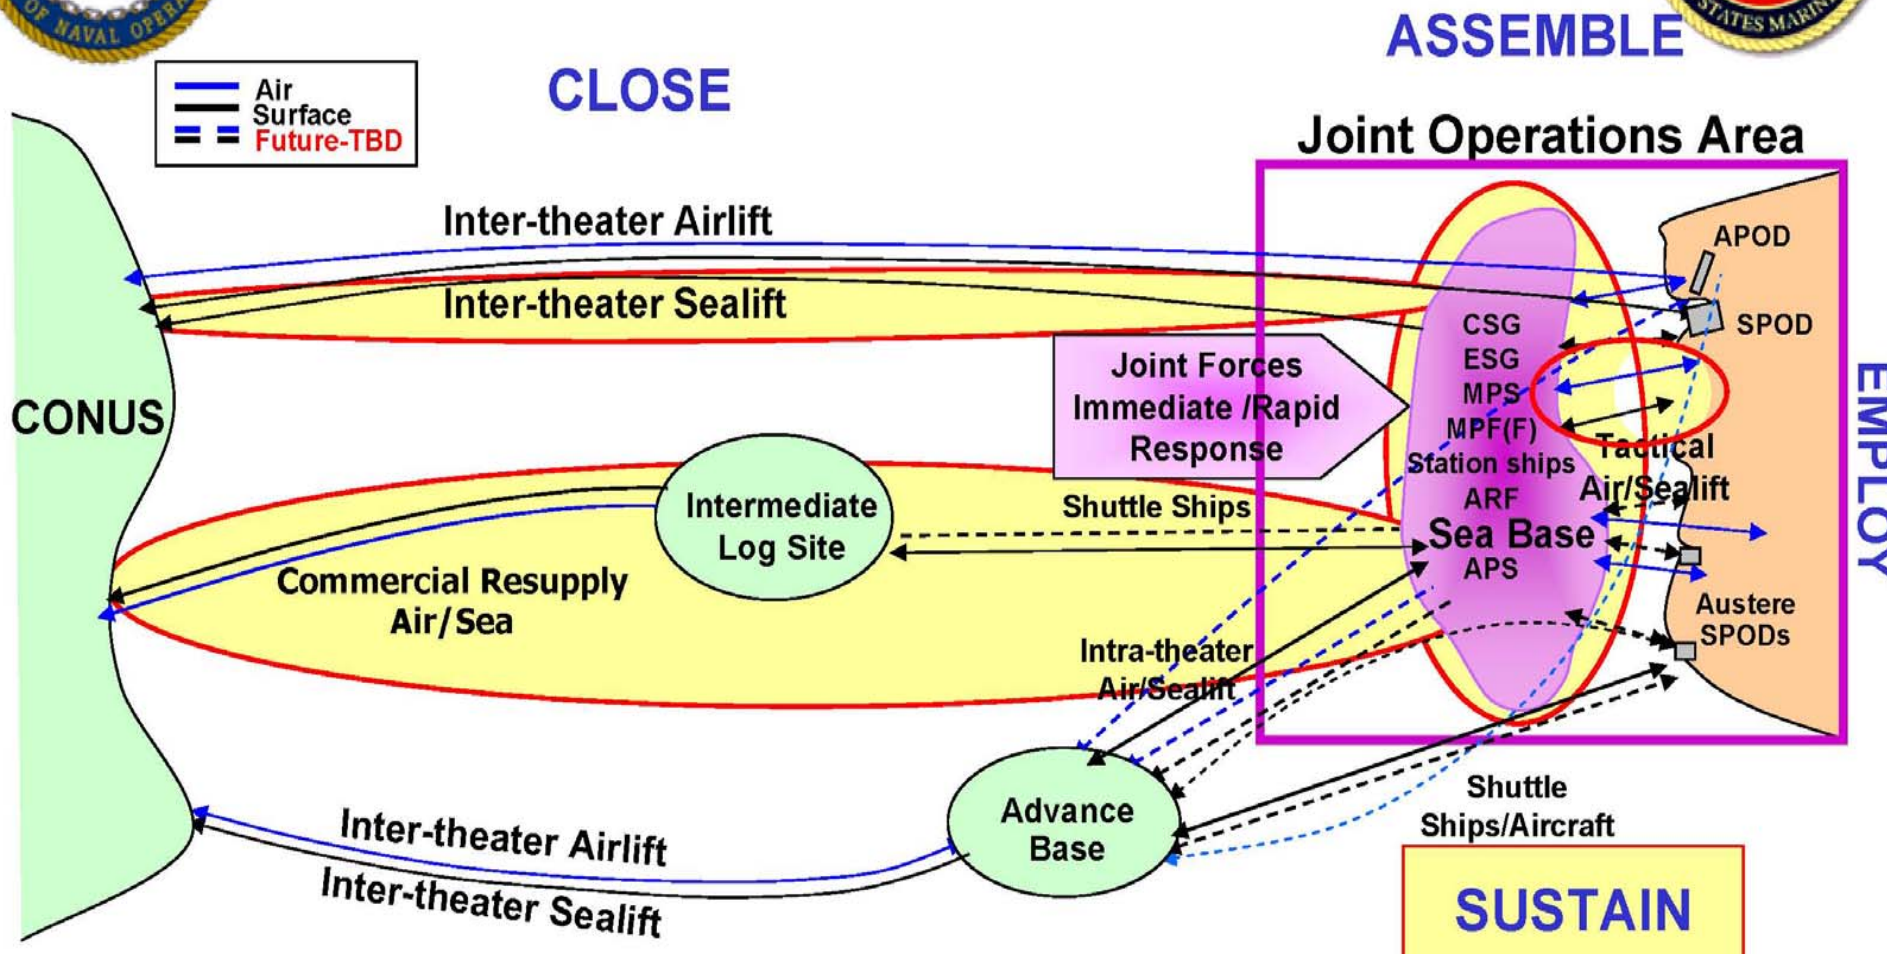

- **Carrier Strike Groups (CSGs),**
- **Expeditionary Strike Groups (ESGs),**
- **Littoral Combat Ships (LCS),**
- **Surface Action Groups (SAGs)**

**But the whole support chain  
looks more like this**

# Seabasing Overview

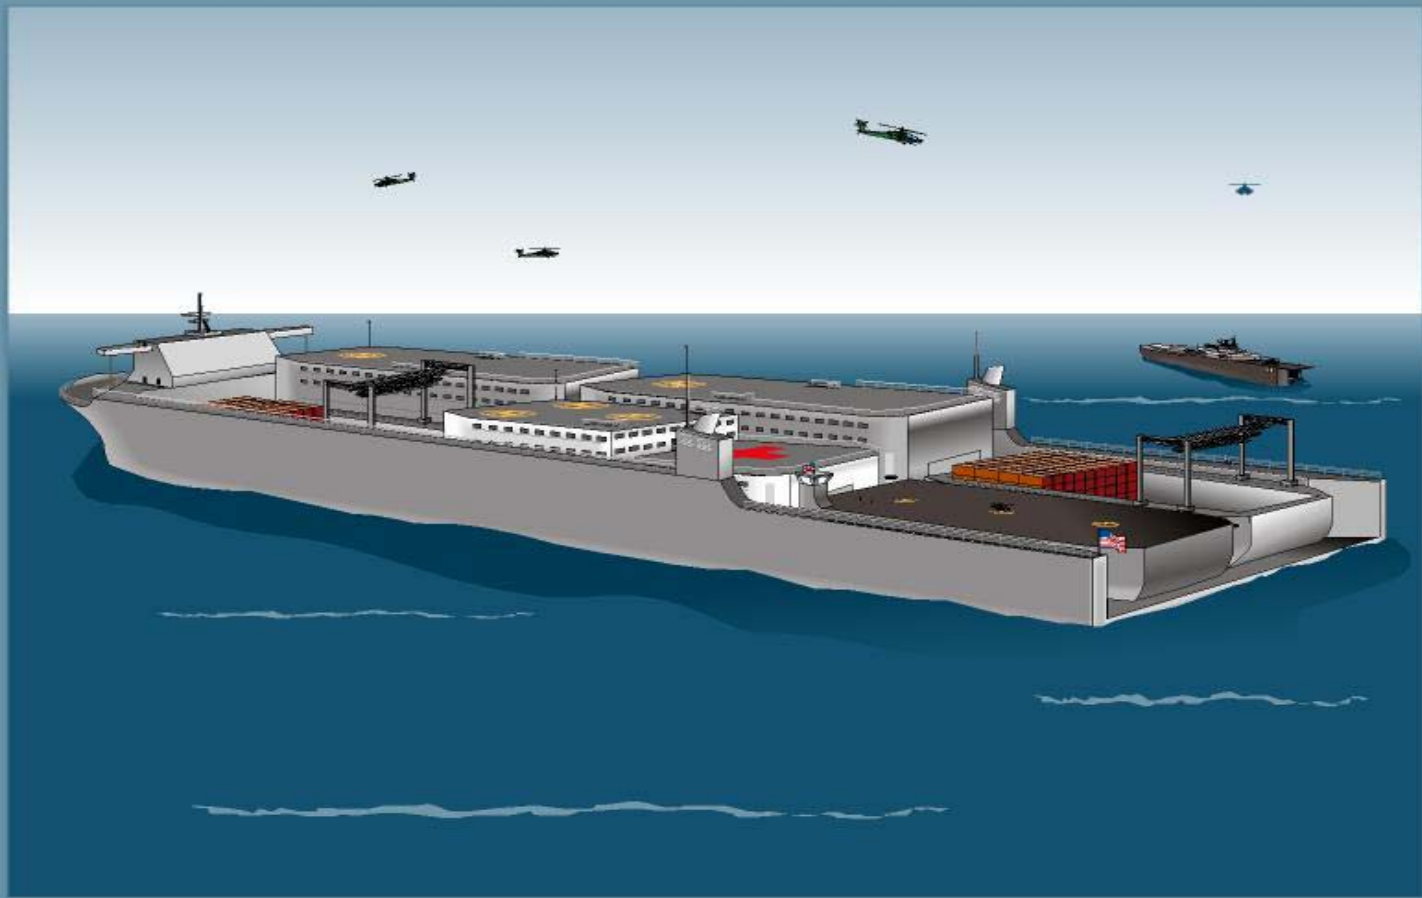

# Current LMSR

# FLO-FLO Concept

## Mother Ship and Modules – Loading Sequence (4)

# FLO-FLO Concept

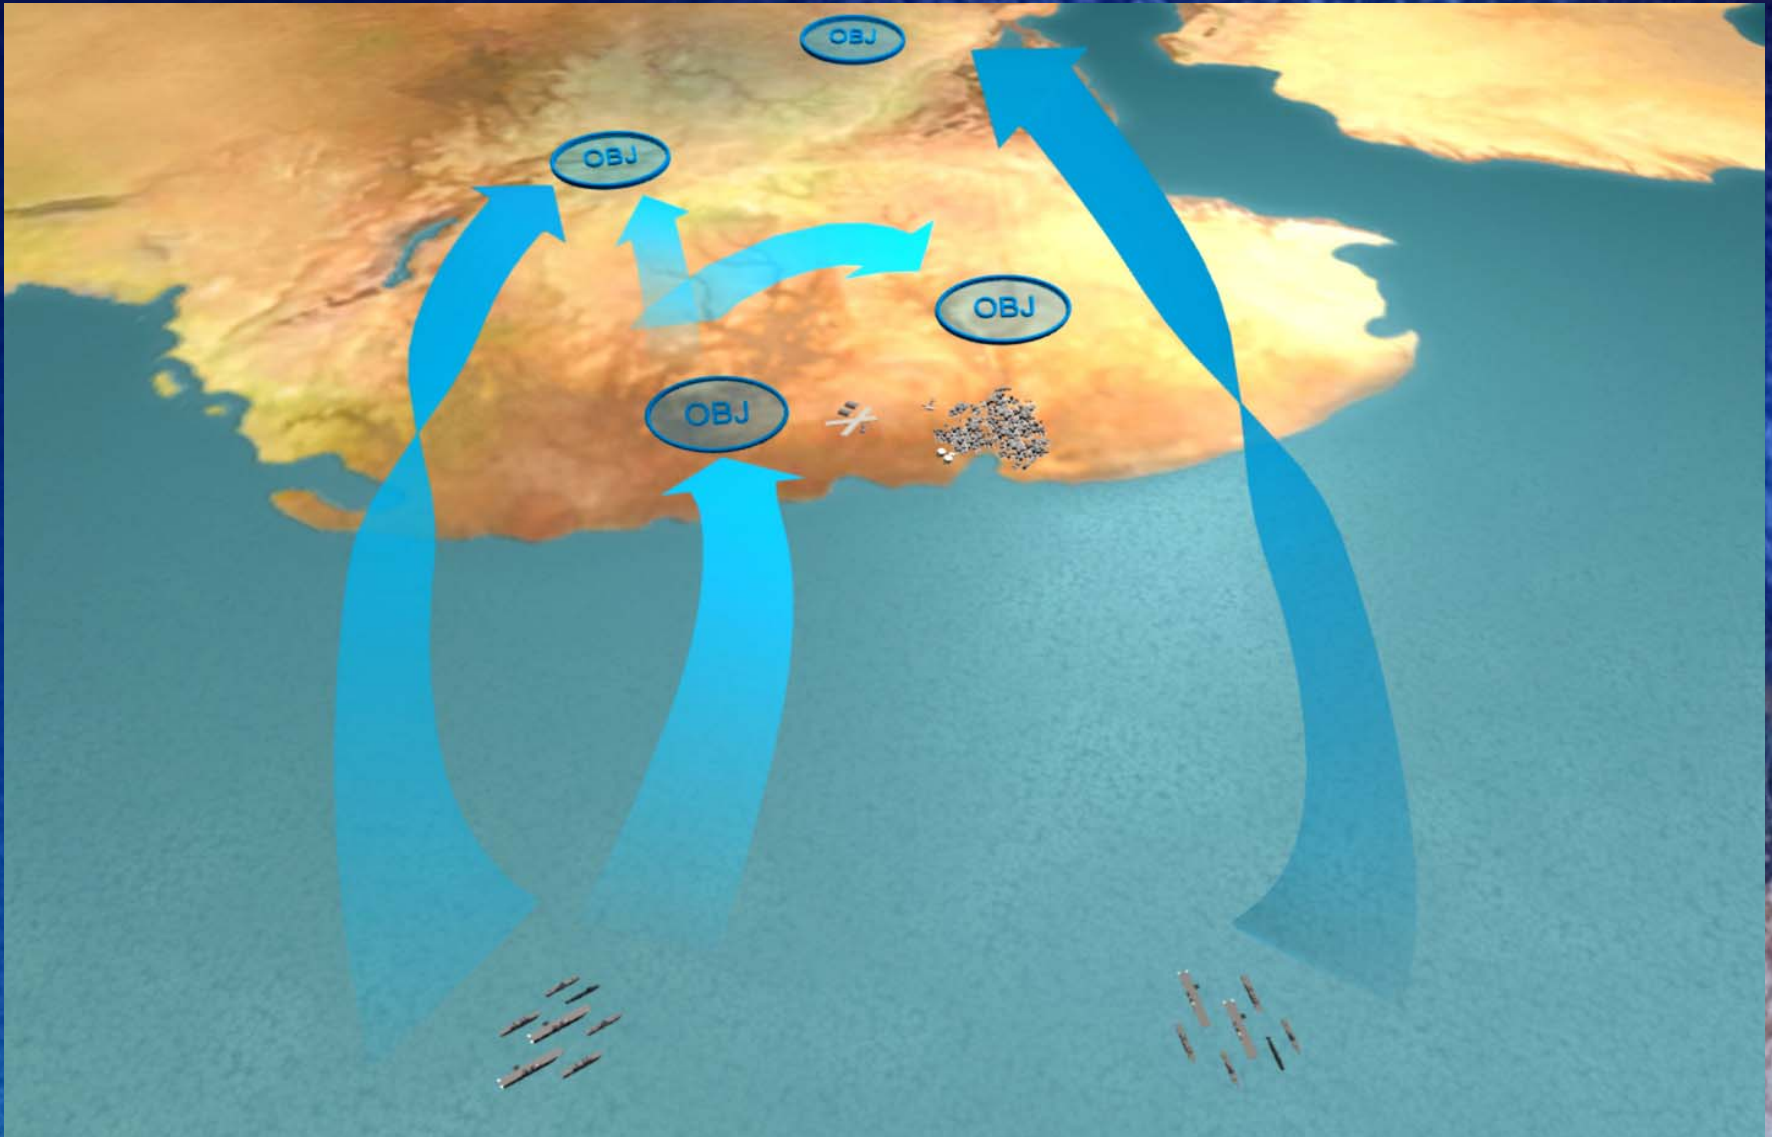

# Converted LMSR's

# Ship-to-Objective Maneuvers

# High Speed Connector

**And do it all in this Sea State:**

# HiCASS Trial

# ILP Trial

# Seabased Stern Ramp RORO
